PROFESSIONAL SUMMARY

Software Developer specializing in mobile application development using Flutter and Firebase. Experienced in engineering robust full-stack solutions, designing scalable software architectures, and analyzing complex system requirements. Adept at managing the complete software development lifecycle, from conceptualization to deployment, to deliver high-quality, maintainable code and functional applications.

EDUCATION

Arab Open University

2022 – 2026 | Cairo, Egypt

Bachelor of Science in Computer Science

- **Graduation Project (Thesis):** Tracks grocery inventory with AI, calculates BMR, and suggests recipes using current ingredients.

PROJECTS

Stocked: Smart Inventory & Grocery App | Flutter, Firebase, Provider

- Directed the end-to-end development of a mobile application to manage household inventory, programming over 15 distinct grocery tracking features.
- Analyzed physiological metrics to code a health module that calculates BMR and generates personalized recipe recommendations.
- Co-authored technical documentation and coordinated report chapters for the project defense, securing 1st Place.
- Constructed a smart recipe substitution engine generating meal alternatives based on available pantry items, reducing missing ingredients issues by an estimated 30%.

Smart Location Assistant | Flutter, OpenStreetMap API

- Integrated the open-source OpenStreetMap API to calculate and deliver the top 5 personalized place recommendations based on saved geographic coordinates.
- Programmed core mapping features including real-time route directions, precise coordinate tracking, and voice-guided navigation.

The Imposter Game | Flutter, Firebase

- Deployed an interactive multiplayer strategy game supporting both online and offline play modes for lobbies of up to 10 concurrent players.
- Devised role distribution algorithms to calculate and distribute imposter variables across 3 distinct lobby sizes and game settings.

Hospital Management System (HMS) | Java, SQL

- Created a desktop application to streamline daily administrative workflows across multiple healthcare departments.
- Deployed modules to securely process and manage 50+ doctor schedules, over 200 patient records, and longitudinal medical histories.

HONORS & ACHIEVEMENTS

- **Best Graduation Project (1st Place):** Arab Open University (2026)
- **University Chess Tournament (3rd Place):** Arab Open University (2025)

TECHNICAL SKILLS

Programming Languages: Dart, Python, Java

Frameworks & Libraries: Flutter, Provider

Backend & APIs: Firebase, REST APIs, OpenStreetMap API, Algolia

Tools & Integrations: Git, GitHub, Cloudinary, ADB, VS Code, Android Studio
