Professional Summary

Dedicated Software Developer and recent Computer Science graduate from Arab Open University, specializing in mobile application development using Flutter and Firebase. Recognized for academic excellence with the 1st Place Best Graduation Project award. Passionate about integrating AI solutions into practical applications, optimizing system performance, and building scalable full-stack projects. An analytical thinker and competitive chess player who brings strong strategic problem-solving skills to complex software challenges.

Education

Arab Open University

2022 – 2026 | Cairo, Egypt

Bachelor of Science in Computer Science

- **Graduation Project (Thesis):** Tracks grocery inventory with AI, calculates BMR, and suggests recipes using current ingredients.

Projects

Stocked: Smart Inventory & Grocery App | Flutter, Firebase, Provider

- Developed a comprehensive mobile application to efficiently manage household inventory and grocery lists.
- Implemented a health module calculating user BMR to generate personalized recipe recommendations tailored to caloric needs and weight goals.
- Engineered a smart recipe substitution engine recommending meals based on available pantry items.

Smart Location Assistant | Flutter, OpenStreetMap API

- Engineered a location-based mobile application offering a viable, customized alternative to standard mapping services.
- Integrated the open-source OpenStreetMap API to deliver personalized place recommendations based on users' saved favorite locations.
- Implemented core mapping features including dynamic route directions, precise coordinate tracking, and voice-guided navigation.

The Imposter Game | Flutter, Firebase

- Developed an interactive multiplayer strategy game supporting seamless online and offline play modes.
- Engineered core mechanics including secure user authentication, real-time turn-based logic, and a dynamic player voting system.
- Programmed advanced role distribution algorithms to manage imposter counts based on lobby size and game settings.

Hospital Management System (HMS) | Java, SQL

- Designed and developed a desktop application to streamline daily administrative and operational workflows in healthcare facilities.
- Built modules to securely manage doctor schedules, patient records, and longitudinal medical histories.

Honors & Achievements

- **Best Graduation Project (1st Place):** Arab Open University (2026)
- **University Chess Tournament (3rd Place):** Arab Open University (2025)
- **Data Science Enthusiast:** Active Kaggle community member exploring data science and Google AI tools.
- **System Optimization:** Developed custom scripts (ADB) to optimize device performance and researched high-res audio output.

Technical Skills

Programming: Dart, Java, Python, C#, PHP, JavaScript, HTML, CSS, SQL

Frameworks & Libraries: Flutter, Provider (State Management)

Backend & Databases: Firebase (Cloud Firestore, Authentication), RESTful APIs

Tools & Integrations: Git, GitHub, OpenStreetMap API, Cloudinary, ADB

Soft Skills

- Strategic Problem-Solving, Analytical Thinking, Adaptability, Fast Learner
- Time Management, Team Collaboration, Resilience

Languages

- **Arabic:** Native
- **English:** Advanced (C1)
